

TRACOE® *comfort* Tracheostomy Tubes

TRACOE® *comfort* Tracheostomy Tube have been producing successful results for over thirty years. Designed for long-term use, the tubes are available in a variety of models and lengths. Patients prefer these tubes over metal tubes because of their flexibility, cosmetic result, and design features.

Features include:

- A flexible, transparent medical grade material which is flexible at room temperature and becomes more pliable at body temperature.
- Featherlight weight which maximizes patient comfort.
- Low profile neck plate and transparent color produces acceptable cosmetic appearance.
- Superior fit and finish of all parts.
- Widest size range available on the market today, including extra-long lengths.
- Custom lengths and fenestrations available.
- Complete selection of accessories available.
